

Alternative Insights and Approaches to Address Sustainability Challenges-Case Studies.

Presented by:
Maryann Sanders

Aerospace Industry

The Goal

- Demonstrate Sustainability and Improve Health and Safety

The Process

- Categorize Carcinogens, Mutagens and Reproductive Toxicants (CMRs) used throughout their Global Operations for Reduction
- Multi-year plan to Designate the Elimination of some CMRs from Facilities Annually
- Report to Stockholders on Efforts

Medical Device Industry

The Goal

- Reduce the Use of Hazardous Chemicals

The Process

- Inventory and Categorization
- Consideration of other Regulatory Requirements
- Assessment of Economic Impact to Business and Replacement Costs

Paper Industry

The Goal

- Create Compliant Products

The Challenge

- Recycle Product with Unknown Content

The Process

- Screening
- Analytical Program/Continuous Monitoring
- Traceability

Chemical Compounder

The Goal

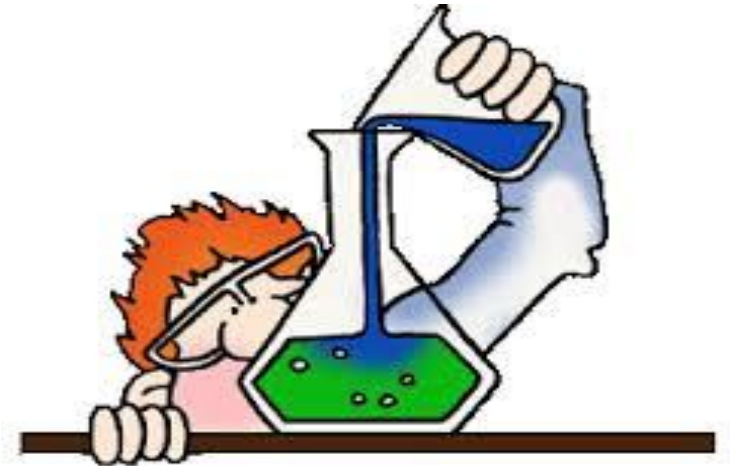

- Maintain the Ability to Conduct Business

The Challenge

- Previous Non-compliance
- Business Risk Management Process – “Act When Caught”
- Department of Homeland Security Audit

The Process

- Need to Re-prioritize Regulatory Compliance

Thank you!
